Presentation to Father Van Wetten
The Catholics of the united parishes of Lacombe, Leduc, Millet and Ponoka have presented their pastor, Rev. Father Van Wetten with a new automobile as a token of respect and esteem for the manner in which he has attended to their spiritual and temporal welfare since his appointment to these important missions.

Since he came to Alberta, Rev. Father Van Wetten has won golden opinions from all classes of the people especially in those districts over which his ministrations extended, and this valuable testimony from the members of his own church is sufficient to show the respect and admiration with which they regard him.

Shoe Week at Arnot's Great Clean-Up Sale

It is not necessary for us to emphasize the fact that shoes of all kinds are exceptionally good buying at today's retail prices. You probably know that as well as we do. You know also that the cost of production and materials are going upward steadily. But do you know that shoe leather is getting so scarce that some men in the trade are predicting that it is only a matter of months until we shall have to face a shoe famine?

Perhaps they are somewhat too pessimistic, but it's wise to take no chances. - - Stock Up at Arnot's.

A Great Stampede of Shoe Prices

Our Shoe Stocks Are Still Well Assorted, and all have been bought before the recent heavy advances in price. Even at our regular selling prices we would be giving you good shoes at least 25 per cent below the market. But that makes no difference to us. We have only a short time to clear up this stock, and we will cut our selling prices \$1.00, \$2.00 and in some cases as much as \$3.00 on a single pair.

Sad Drowning at Gull Lake

Miss Grace Snyder, of Ponoka, and Thomas Hughes, employed at the Empire Garage here, were drowned while canoeing on Gull Lake on Sunday afternoon. It appears that the young couple were changing places in the canoe at the time it capsized, as parties close by saw them standing up in the craft just before the cries for help were heard. As soon as the news was circulated on the beach search parties were immediately organized, and the lake was dragged for the bodies. The police from Red Deer were sent for, and they arrived about six o'clock with grappling irons etc. The body of Miss Snyder was recovered about 9 o'clock by the party in Robt. MacDonald's launch, being taken from the water about five-hundred

yards from where the accident occurred. Search was kept up all Sunday night and Monday for the other body, but it was not discovered until about 2 o'clock on Tuesday afternoon almost at the place the boat was seen to capsize. Both bodies were taken to Ponoka for interment.

The accident cast a gloom over the cottagers at the lake, and many of them left for home on Monday. The accident, while most unfortunate, is one of those things that cannot be helped while people are used to boats will persist in going out in boats that require the management of experts. It is the first fatal accident at Gull Lake since July 1st, 1906, when the Macdonald sisters were drowned near the same spot while bathing.

An account in the Edmonton Bulletin with reference to the cause of the accident requires contradiction. That paper says in its report that the canoe given to the

unfortunates by Mr. Williamson had been patched, and that the patch had come off and the canoe sank. That is not true. The canoe was in perfect order, in fact, as safe as a craft of its kind can be. Mr. Williamson is always most careful that any boat sent out is seaworthy, as residents at the lake will verify.

Predict Sugar will Soar to 20 Cents per Pound

Ottawa, Aug. 23—Wholesale grocers in convention at the Chateau Laurier last night, predicted that sugar would soar to 20 cents a pound before the present shortage is relieved. They declared a real famine would exist before supplies in Canada have caught up, and placed the blame chiefly on the seamen's strike in New York. As an emergency measure the purchase of 50 carloads of sugar tied

up in Canada owing to shipping difficulties, has been recommended by a committee of the wholesale grocers. They will pay, it is said 15c. a pound and the price to consumers will be 16 to 17c.

A committee they appointed to report on the sugar shortage could give no hope of relief inside of the next month. The decision to buy the 50 loads available was arrived at without hesitation, and when the sugar is available it will be distributed among wholesalers throughout the country. The association pledged itself to assist the board of commerce in its efforts to reduce the cost of living. Differences of detail and disputes between wholesalers and retailers are to be settled in future by a board composed of six from each class of the grocery trade. The members are not yet named.

The convention closed last night and next year it will be held in Toronto.

Three Days More and Duck Gets Place on Menu

Three days more and friend duck is going to take its place on the bill of fare. The opening of the shooting season on Sept. 1st has already caused a speeding up of official activity in the provincial game guard's quarters, and a supply of licenses is being distributed to all dealers throughout the province, the passport for 1919 being printed in green ink and reiterating the request for the licensee's age, occupation and color of hair.

The duck shooting season opens on September 1st, and closes December 14th. The prairie chicken and partridge season opens on October 1st and ends November 14th. While ducks have been driven from habitual haunts by the drying of small lakes and ponds there is said to be a most attractive assemblage of mallards et al. on the larger lakes, such as Hay Lakes, and the Chain of Lakes leading toward Buffalo Lake beyond Bashaw. Likewise there has been a promising batch on the big waters up north during the season and a few cold nights will start the duck southward.

All reports proclaim prairie chicken more numerous than for 3 or 4 years back and partridge too, are said to be fairly numerous in many districts.

The department expects to see more hunters than usual in the field this fall. While the war was on the majority of gunners were absent on more important business, but this season, with the men at home again, wing shooting and big game stalking is likely to be revived. The opening of the mountain sheep and goats is between September 1st and November 1st. For deer, moose and caribou, the season is between November 1st and December 15th. Duck hunters are limited to a bag of 20 a day, or 200 the season.

O'Connor's System For Food Investigation Fully Restored

Ottawa.—The board of commerce held its first session on Thursday and issued an order, the effect of which is that the office of the cost of living commissioner being now abolished the system of investigation established by Mr. O'Connor in 1916 and continued by him until his resignation two years later, is fully restored and will be augmented in its scope, so far as possible, the former staff will be gathered together under the jurisdiction of the board. "Rigorous compliance with the requirements of the new act and the boards order will be enforced," according to the statement issued.

at the close of the afternoon's session.

"All the records made under the previously prevailing investigation system will be secured and taken over by the board, and, in addition, as soon as the board can make the arrangements, and before the lapse of many weeks, the full board will, in joint session, visit all the principal cities of Canada and conduct therein courses of inquiry into the cost and price conditions and means of remedying these conditions. Only such delay will ensue before the board sets out as is imperatively necessary in order to enable intelligent inquiry.

"In the meantime, the board is organizing its personnel and preparing its itinerary.

"When the intended sittings are held they will be open to all who wish to complain or testify, or defend allegations made. No formality nor any notice will be required. Afterwards, from the information on hand and to be gained the board will take such action as it seems proper by way of general remedy. Special remedies will be applied as the occasion for the application arises."

Will Drill for Oil in Southern Alberta

Lethbridge, Alta., Aug. 16.—Announcement was made here this morning by Charles E. Taylor, chief geologist for the Imperial Oil Co., in Alberta, that as a result of a geological survey made by 12 crews who have been working the foothills section of Alberta all spring and summer, the company will start drilling southwest of Lethbridge as soon as a rig can be put on the ground. The site of the drilling operations has already been chosen. The company is determined to make a dry test hole in Alberta for oil, and their campaign plans for the drilling of a series of test holes in the first anticline, east of the mountains all the way from the international boundary to the Mackenzie river basin.

Boys' and Girls' Club

In an effort to stimulate interest among the boys and girls of the district, the Union Bank of Canada proposes starting what is known as a Boys and Girls Club. Any boy or girl of sixteen or under is eligible and the plan is briefly as follows:

The bank will advance sufficient money to any Boy or Girl to purchase a calf, or a pig or a lamb, taking the Boys or Girls Note for the amount without any further security. The animals are to be fed and attended to by the Boy or Girl and suitable prizes will be given by the bank at the annual

"Fruit-a-tives" is certainly a wonder. For a year, I suffered with Rheumatism; being forced to stay in bed for five months. I tried all kinds of medicine but without getting better; and thought I would never be able to walk again.

"One day while lying in bed, I read about 'Fruit-a-tives' the great fruit medicine; and it seemed just what I needed, so I decided to try it.

The first box helped me, and I took the tablets regularly until every trace of the Rheumatism left me.

I have every confidence in 'Fruit-a-tives' and strongly recommend them to every sufferer from Rheumatism".

The bank feels that a great deal of benefit may be attained, both for the Boys and Girls, as well as for the district and wishes to have the name of every boy or girl who wishes to join the club. Let the boys or girls either call and see Mr. Graham or have their parents do so as soon as possible so that the club may be started at once.

Aero Collides With Auto when Making Ascent

Halifax.—After making the cross country flight from Truro, a distance of 60 miles in 45 minutes, an aeroplane piloted by Captain J. V. Stephens, R.F.C., and Lieut. Barnhill, R.F.C., and under contract to deliver copies of a new weekly to mayors of various towns in the province, collided with an automobile while making ascent on Saturday and was badly damaged. The flight was resumed on the arrival of new parts of aeroplane.

It's Up to You!

Why should you go through life with half sight, or poor vision? The other day I fitted a man with glasses who had gone through life so near sighted that he could not recognize a friend across the street. This man had never known the joy of clear vision, and it was a pleasure to see his delight when he viewed distant objects for the first time.

Then there is a person who has a headache after reading for a short time. It is more painful that the near sighted condition, but yields equally when proper glasses are worn. If you are having trouble with your eyes, have them tested.

Only Their Determination to Win Carried Officers through to End

Calgary, Aug. 22.—There were days previous to August, 1918, said Sir Arthur Currie, in his address here yesterday "when it was nothing but the rugged determination and will to win that carried the officers and men through, but with the breach of Hindenburg line at the hinge with the Queant-Drocourt line, things had changed and people in the allied countries began to get new heart for the struggle."

"I am glad of the welcome which has been extended me," said General Currie, "because I feel it is meant for every man who fought and bled with us."

"There is no member of the force who wants to take undue credit. Our great strength lay in the fact that we were one big fighting machine and we were all doing our share as we saw fit."

General Currie referred to the growth of respect for the Canadian force from the arrival in France until the end of the war. In the last three months of war the Canadians had fired twenty-five per cent of the ammunition fired by the entire British army. When the enemy had first used poison gas (General Smith-Dorrien had said to him that knowing of the enemy tactics and the retirement of the troops to the left and right of the Canadians, he (General Smith-Dorrien) had foreseen the worst disaster in the annals of the British army.

When the boys came back that the Canadians were holding he could not believe it and had sent up again for news. The reputation then made for doggedness was more than borne out by the Canadians in the later years until in the end the Canadians had been recognized as the hardest hitting force on the allied front.

The different organization method which made it possible to choose certain divisions for certain work and the pooling of the engineers and artillery of the corps had given the Canadians an advantage, said Inspector General Currie and this factor was largely responsible for their success later on. "I am glad to say," said the speaker, "that our army fought against the greatest military machine the world ever produced, yet never lost a gun, in fact the last 2 years never failed to take an objective and there were some of our divisions which never allowed a hostile foot to enter their trenches. We never lost an inch of ground that we had once consolidated."

The hundred days from Aug. 8, 1918 had seen remarkable success and Gen. Currie said he could urge the government to create the people more in what that period meant to Canada. The Canadians has been previously held as Haig's reserve, ready to move wherever the Boche struck. "And," said Gen. Currie, "it was only a question then of how many more blows he could withstand." Haig said that in all the dark days his remaining comfort was that he had the Canadians to fall back on.

The Canadians force had been used as the spearhead in the Amiens drive. "We made the plan, set the time and the place," said General Currie. "The force had been perfect and the objective, the old Amiens line, was taken the 1st night. That day we penetrated eight miles, the greatest penetration made by any army in the war, and our victory was wonderful off. By August 13, we had penetrated 24,000 yards and reached the old Somme battlefield, which the Boche had left in 1916."

General Currie said he had then advised that the Canadians moved to assist the third British army driving from Bapaume, and after that army had later struck, the Canadians were called upon and were first to break the Hindenburg line. During the eight days the battle lasted, they pierced five systems of German trenches. The Canadians in the last 100 days had faced forty-seven different Boche divisions, or more than a quarter of the enemy

forces on the western front. No force in the world, said General Currie, had played a greater part in finally ending the struggle and bringing the Boche to his knees.

The spirit of the troops even to the last, had been such that the runners and stretcher bearers worked through gas attacks without masks in order to give their comrades better support and assistance. Of the sixty-four Victoria Crosses won by Canadians during the war, thirty had been awarded the last 100 days. There was nothing the men would not do to win.

Of the men who lie buried in France, and Flanders, Canada can best cherish their memory by doing her duty to those who were their dependents as the men had done their duty for Canada.

Women's Institute

The Women's Institute of the Lacombe Constituency held a very successful conference in the Lacombe Rest Room on the afternoon of Aug. 15. After singing O Canada the Representatives from Alice Clive, Blackfalds, Lockhart and Lacombe read very interesting and encouraging reports. In the general discussion which followed the reports there was noted a desire on the part of the members to make each Institute more efficient and progressive. This was followed by a very instructive address by Mrs. A. H. Rodgers of Fort Saskatchewan, Provincial Secretary, which suggested some very helpful lines of work the Institutes may follow. The using of our influence to improve rural school conditions. Helping to elect women to the school boards. Taking an interest in municipal affairs. Co-operating with the U. G. and U. G. W. A., emphasizing a desire to work with other organizations in harmony and for the general good of all.

The music and entertainment by the Lacombe Ladies was greatly appreciated, and we wish to express the thanks of the conference to them for the able manner in which the arrangements were carried out. Four resolutions were discussed and passed as follows.

1st. Condemning the action of the Canadian senate on the Prohibition Bill.

2nd. Objecting to the veto of the bill for the raise of the age of consent.

3rd. Asking the Alberta legislature to extend the mother's pension act.

4th. Asking the continued restriction on the sale of light wines and beer.

Lenient Peace Terms Demand

That the peace treaty lets Germany off more easily than it deserved to expect is generally admitted; and is pointed to as proof of the magnanimous spirit of the Allies as compared with ruthless severity with which German officials ground the faces of the people in Belgium, Northern France, and Poland, and the Austrian officials the people of Serbia.

It may be that the terms of the treaty make the nearest approach to imposing justice upon war-making power that the circumstances permitted. A situation so complicated and with so many diverse interests involved, is not one in which it is easy to affix penalties in proper proportion to the offence. The stupendous scale on which the war was waged and the duration of it, in themselves tended to fix bounds to the punishment that could be imposed upon the power responsible for starting it. There must be a limit even to Germany's ability to pay; and the terms of the treaty doubtless reflect, in some measure the calculation of the Allied government as to how much could be collected.

That there is a sharp contrast between the terms forecasted and the terms actually arranged is clear enough. There was to be—no Allied peoples were assured by their leaders—no negotiated peace. The terms were to be dictated to Germany, with an ultimatum to sign on the dotted line or take the consequences; and the terms were to impose upon Germany the duty of paying the whole cost of the war, with reparation for every office in contravention of the traditions and recognized rules of warfare. In the event the terms were not dictated, but negotiated. And Germany is not obliged to pay the whole cost of the war, in fact just what it is to pay neither Germany nor the Allies knew. The Allies, unarmed are to collect what they can.

Whatever may be hoped from or claimed for the treaty, it can scarcely be hoped or claimed that it imposes such conditions upon the peace breaker as will stand as effective warning to the nations in future to keep clear of world power ambitions. The very leniency that is boasted on behalf of the treaty negatives the idea that the terms are exemplary. And exemplary terms are what must have been imposed if the purpose were to make clear for the future that an attempt to enslave mankind would lead only and inevitably to the ruin of the conspiring nation.

The notion that the great war has ended war—so widely exploited a couple of years ago—is both delusive and dangerous. The treaty exposed its fallacy. Never in the history of the world were such horrors brought upon the human race as Berlin invoked when five years ago she blocked the way to negotiation and launched its drive for supremacy. Yet Germany is not ruined in consequence. That it will even pay the money cost of the effort to prevent its conspiracy is not pretended. Canada and the other Allied nations are to pay their own war debts; all the stirring up of national feeling and the forecasts of exemplary punishment to the contrary. Future Wilhelms in Germany or elsewhere, may point to this treaty as proof that the wages of the sin of world-power ambition is not national death.

For the Allies moral is that defence measure cannot be ignored without inviting disaster. The war is ended, but war is not ended. What they have they must hold or be prepared to hold. In the last analysis safety depends upon readiness; that fact the treaty does not, and could not abolish.

Wheat Price And British Commission

Ottawa Aug. 20—No official notification has reached the department of trade and commerce of the fixing of the price of wheat imported to Great Britain by the British wheat commission. A London cablegram Wednesday morning said a maximum of \$1.80 a bushel for Canadian wheat had been decided upon. This with the fixed initial payment of \$2.15 to Canadian farmers by the Canadian wheat board of control, would mean a serious financial loss to be adjusted. It is expected that an official explanation will be forthcoming very shortly.

Winnipeg, Aug. 20—In the interview tonight on the price of \$1.80 set by Great Britain for Canadian wheat, W. Stanford Evans, who represented the millers at the recent conference at Ottawa said:

"The situation is quite simple. This price of \$1.80, mentioned in the cable has nothing to do with price at which British govt. will buy wheat, but the price at which it will re-sell, in conformity with its policy to ensure the nine-penny loaf."

"Great Britain absorbs the difference between the purchase price and price necessary to allow for the turning out of the four pound loaf for nine penny. Canadian wheat, grading No. 1 Northern cannot be made into bread for nine penny a loaf."

"Last year it cost Great Britain \$235,000,000 to make up the difference between the price at which it had to be sold to allow for the ninepenny loaf."

It had to charge prices for wheat which were less than the purchase price.

"This \$1.80 mentioned in the ca-

**Why the Case Tractor Leads All Others**

- 1 One piece cast main frame, forming dustproof housings for rear axle, bull pinion shaft, transmission and the bearings for these parts. Also a base for motor. This construction brings rigidity and prevents disalignment.
- 2 All traction gears are cut steel, enclosed and running in oil. No bevel gears, chain, worm or friction drive parts.
- 3 Case air washer delivers clean air to carburetor. No grit nor dust gets in to cylinders to minimize their efficiency and shorten their life.
- 4 Four-cylinder Case valve-in-head motor. Removable head. Motor is set crosswise on frame, affording use of all straight spur gears. This conserves power.
- 5 Case Siphon Thermostat control cooling system and insure complete combustion of kerosene in the motor. Prevents raw fuel from passing by the pistons and diluting oil in crank case.
- 6 Weighs about 3,400 pounds; little more than a team of horses. Low and compact with short wheelbase. Turns in 22 ft. circle. Stays on all fours.
- 7 Rated 10 horsepower on draw bar, but develops nearly 14 horsepower. Rated 18 horsepower on the belt, but develops about 24 horsepower. This insures abundant reserve power.
- 8 Belt pulley mounted on the engine crank shaft. No gears used to drive it. Pulley is part of the Tractor, not an extra-cost accessory.
- 9 All interior motor parts lubricated by a combination pump and splash system. Speed governor, fan drive and magneto are dustproof and well oiled.
- 10 Complete accessibility. No dismounting necessary. Removable covers permit you to get at parts quickly.
- 11 Hyatt roller bearings in rear axle, bull pinion shaft and transmission case. Kingston ignition and carburetor. Five piece radiator with a cast frame. Core, fin and copper tube; non-clogging type.

Deering Binders through the past years has proven itself. Ask the man who bought one ten years ago. These men can give you convincing facts, the long life, light draft, and the satisfaction you get while cutting the crop far exceed any binder on the market.

The same Deering Knottor has done its work for the past 30 years, why has the Deering knottor practically never been changed, simply because it has done its work satisfactorily. What better can you ask--don't risk buying a binder with a knottor that has been changed every year; Their reason for changing the knottor is because it has not done the work, let these companies pay for their experience, not you, Mr. Farmer. Drop in when in town and see our stock of binders, and don't forget the repairs, we have a complete stock on hand. That question of repairs when buying a binder is a big one. Solve this question by buying a Deering. The International Harvester Co. is excelled by none in the completeness and efficiency of their Repair Dept.

The International Harvester Co. ready to serve you through us.

Canada Plans New Loan of 250 Million

New York, Aug. 21--This morning's Tribune says:

"The Dominion of Canada is planning an internal loan of approximately \$250,000,000. It was learned yesterday, according to preliminary information which reached here, the new bonds will be offered to the public in October at a 5 1/2 percent basis, without tax exemption features."

"This rate which has been mentioned in authoritative Canadian circles is, in the opinion of bankers, far less than Canada would have to pay for a loan in this country."

try. In the recent \$75,000,000 loan, which was offered here by a syndicate of bankers headed by J. P. Morgan and Co., the yield to investors was 5.90 percent, and conditions of the investment market at that time were regarded as more favorable to borrowers than at present. Chicago and Canadian bankers underwrote \$3,000,000 of province of Ontario bonds a short time ago, and offered them to investors on a 6 1/4 basis.

Although the exchange rate is more than 4 percent against Canada, the Dominion finance ministry, it is said, feels that it would be inadvisable to borrow more in this country in the near future. The Canadian authorities share the British view, that an adverse form will act as a barrier to an extensive purchase of merchandise in this country and thus prevent the unlimited piling up of indebtedness. But Canadian bankers say, especially objects to paying the high interest rate which the American market would demand.

The banking community continues to discuss other foreign financing, but the consensus of opinions is that impending European and S. American loans will be delayed till the fall, when it is expected the investment market will reveal more absorptive power. The market is still described as soggy.

Adventurers of the North (Edmonton Journal)

The bones of those hardy adventurers who long centuries ago set sail from old lands in search of romance in the west have long since passed back to dust, but the spirit of adventure seems to be immortal. Ulysses the greatest wanderer of them all refused immortality, but in spite of himself gained it. His soul has been reincarnated many times over and always in the bodies of those who thirst for adventure. Nothing emphasizes the unique position of Edmonton more than the realization that here is the first stopping place of those who explore the far north. From this city the adventurer gets his first sight of great lands to be travelled and great wastes to be reclaimed. It is to Edmonton they come to report their findings in the Arctic circle, and he first tales of new lands and new people are told here.

Within the past few weeks at least two explorers have reached Edmonton after many months of travelling up north. These have been able to explain many features of Arctic life that hitherto have been erroneously held regarding the natives of the arctic.

The civilized world has always believed the Eskimo to be an ignorant savage, unintelligent and untalented. Now we are told that he is a man of ambition and equal morally and physically to the best races on earth.

The finding of coal in the north in great quantities means less to this generation than to those who follow.

Every year will draw civilized Canada closer to the northern regions and the advance of civilization will be in the direction that men such as Stephenson, Storker and Knight have mapped out.

There will be no more dances at Gull Lake this season, the pavilion being closed for the year.

They Wont Enthuse Over Laurier's Successor

The appointment of Mackenzie King as Liberal leader has effectively squelched any chances that party may have had at the next general election. Though a young man single, and physically sound, he took no part in the war. This puts the everlasting kibosh on the Liberal party for some time to come. Mackenzie King dwelt snugly and comfortably over in the States while the war was in progress, having gone over the border two months after the war started. He took a safe trip to England after the armistice was signed and returned to Canada a week or so before the convention. He has not figured even in a casual capacity in connection with the Red Cross or other patriotic war work. Obviously it was the Quebec bunch who elected him leader, his war activities being of the kind to meet with the warm approval of the Peasoupsters.
